PRESS STATEMENT

MONTGOMERY-- ALEA’s Driver License Division conducted a thorough review concerning the recent allegation by an individual claiming to be wrongly excluded from the polls due to a driver license error, which affected the 27 Senate District primary election. The enquiry discovered the individual in question possesses a driver license issued by the State of Georgia. It also revealed the individual visited the ALEA Driver License Office in Opelika, to obtain an Alabama Driver’s License. However, did not complete an issuance transaction and was never issued an Alabama Driver License. The individual still holds a current Georgia Driver License.

Voter registration information from ALEA’s Driver License Division is only sent after the credential is issued and the customer signs the required voter declaration, which did not occur in this specific incident.

Voter registration information is filed nightly by ALEA’s Driver License Division to the Secretary of State’s Office to ensure each citizen’s voter registration is up to date.
